MCB Bank Limited

Capital Adequacy & Liquidity Disclosures
Unconsolidated
As at December 31, 2018

MCB BANK LIMITED
CAPITAL ADEQUACY AND LIQUIDITY DISCLOSURES - UNCONSOLIDATED
AS AT DECEMBER 31, 2018

1. CAPITAL ASSESSMENT AND ADEQUACY

1.1 Scope of Applications

The Basel-III Framework is applicable to the bank both at the consolidated level (comprising of wholly/partially owned subsidiaries & associates) and on a stand alone basis. Subsidiaries are included while calculating Consolidated Capital Adequacy for the Bank using full consolidation method whereas associates in which the bank has significant influence on equity method. Standardized Approach is used for calculating the Capital Adequacy for Credit and Market risk, whereas, Basic Indicator Approach (BIA) is used for Operational Risk Capital Adequacy purposes.

1.2 Capital Management

Objectives and goals of managing capital

The Bank manages its capital to attain following objectives and goals:

- an appropriately capitalized status, as defined by banking regulations;
- acquire strong credit ratings that enable an optimized funding mix and liquidity sources at lesser costs;
- cover all risks underlying business activities;
- retain flexibility to harness future investment opportunities; build and expand even in stressed times.

Statutory minimum capital requirement and Capital Adequacy Ratio

The State Bank of Pakistan through its BSD Circular No.07 of 2009 dated April 15, 2009 requires the minimum paid up capital (net of losses) for all locally incorporated banks to be raised to Rs. 10 billion by the year ended on December 31, 2013. The raise was to be achieved in a phased manner requiring Rs.10 billion paid up capital (net of losses) by the end of the financial year 2013. The paid up capital of the Bank for the year ended December 31, 2018 stands at Rs. 11.851 billion and is in compliance with the SBP requirement.

The capital adequacy ratio of the Bank was subject to the Basel III capital adequacy guidelines stipulated by the State Bank of Pakistan through its BPRD Circular No. 06 of 2013 dated August 15, 2013. These instructions are effective from December 31, 2013 in a phased manner with full implementation intended by December 31, 2019. Under Basel III guidelines banks are required to maintain the following ratios on an ongoing basis:

Phase-in arrangement and full implementation of the minimum capital requirements:

		Year End						As of Dec 31
Sr. No	**Ratio**	**2013**	**2014**	**2015**	**2016**	**2017**	**2018**	**31-12-2019**
1	CET1	5.00%	5.50%	6.00%	6.00%	6.00%	6.00%	6.00%
2	ADT-1	1.50%	1.50%	1.50%	1.50%	1.50%	1.50%	1.50%
3	Tier 1	6.50%	7.00%	7.50%	7.50%	7.50%	7.50%	7.50%
4	**Total Capital**	**10.00%**	**10.00%**	**10.00%**	**10.00%**	**10.00%**	**10.00%**	**10.00%**
5	*CCB	-	-	0.25%	0.65%	1.275%	1.90%	2.50%
6	**Total Capital plus CCB**	**10.00%**	**10.00%**	**10.25%**	**10.65%**	**11.275%**	**11.90%**	**12.50%**

- *Capital Conservation Buffer (CCB) Consisting of CET1 only

Bank’s regulatory capital is analysed into three tiers.

- Common Equity Tier 1 capital (CET1), which includes fully paid up capital (including the bonus shares), balance in share premium account, general reserves, statutory reserves as per the financial statements and net unappropriated profits after all regulatory adjustments applicable on CET1

- Additional Tier 1 Capital (AT1), which includes perpetual non-cumulative preference shares and Share premium resulting from the issuance of preference shares balance in share premium account after all regulatory adjustments applicable on AT1

The deduction from Tier 1 Capital include mainly:

i) Book value of goodwill / intangibles;

ii) Deficit on revaluation of available for sale investments - net of deferred tax

ii) Defined-benefit pension fund net assets - net of deferred tax

iv) Reciprocal cross holdings in equity capital instruments of other banks, financial institutions and insurance companies;

v) Investment in mutual funds above a prescribed ceiling;

vi) Threshold deductions applicable from 2014 on deferred tax assets and certain investments;

- Tier 2 capital, which includes Subordinated debt/ Instruments, general provisions for loan losses (up to a maximum of 1.25 % of credit risk weighted assets), Net of tax reserves on revaluation of fixed assets and investments and foreign exchange translation reserves after all regulatory adjustments applicable on Tier-2

The deductions from Tier 2 include mainly:

i) Reciprocal cross holdings in other capital instruments of other banks, financial institution and insurance companies;

The required capital adequacy ratio including CCB (11.90% of the risk-weighted assets) is achieved by the Bank through retention of profit, improvement in the asset quality at the existing volume level, ensuring better recovery management and composition of asset mix with low risk. Banking operations are categorized as either trading book or banking book and risk-weighted assets are determined according to specified requirements of the State Bank of Pakistan that seek to reflect the varying levels of risk attached to assets and off-balance sheet exposures. The total risk-weighted exposures comprise of the credit risk, market risk and operational risk.

Basel-III Framework enables a more risk-sensitive regulatory capital calculation to promote long term viability of the Bank. As the Bank conducts business on a wide area network basis, it is critical that it is able to continuously monitor the exposure across entire organization and aggregate the risks so as to take an integrated view. Maximization of the return on risk-adjusted capital is the principal basis to be used in determining how capital is allocated within the Bank to particular operations or activities.

The Bank remained compliant with all regulatory capital requirements through out the year.

1.5 Main Features Template of Regulatory Capital Instruments

		Common Shares	Debt Instruments
1	Issuer	MCB Bank Limited	MCB Bank Limited
2	Unique identifier (eg KSE Symbol or Bloomberg identifier etc.)	MCB	MCB - Tier II
3	Governing law(s) of the instrument	Relevant Capital Market Laws	Laws applicable in Pakistan
	Regulatory treatment		
4	Transitional Basel III rules	Common equity Tier 1	Tier II Capital
5	Post-transitional Basel III rules	Common equity Tier 1	Tier II Capital
6	Eligible at solo/ group/ group&solo	Group & standalone	Group & standalone
7	Instrument type	Common Shares	Subordinated loan
8	Amount recognized in regulatory capital (Currency in PKR thousands, as of reporting date)	11,850,600	2,334,611
9	Par value of instrument	PKR 10 per share	PKR 5,000
10	Accounting classification	Shareholder equity	Subordinated loan
11	Original date of issuance	1947	19-Jun-14
12	Perpetual or dated	Perpetual	dated
13	Original maturity date	No maturity	19-Jun-22
14	Issuer call subject to prior supervisory approval	Not applicable	yes
15	Optional call date, contingent call dates and redemption amount	Not applicable	Callable with prior approval of SBP on or after five years from the date of issue
16	Subsequent call dates, if applicable	Not applicable	Not applicable
	Coupons / dividends		
17	Fixed or floating dividend/ coupon	Not applicable	Floating
18	coupon rate and any related index/ benchmark	Not applicable	Six months KIBOR (Ask side) + 1.15%
19	Existence of a dividend stopper	No	No
20	Fully discretionary, partially discretionary or mandatory	Fully discretionary	Mandatory
21	Existence of step up or other incentive to redeem	No	No
22	Noncumulative or cumulative	Not applicable	Not applicable
	Convertible or non-convertible		Convertible
23	If convertible, conversion trigger (s)	Not applicable	The instrument will be subject to loss absorbency clause as stipulated in terms of the Basel III Guidelines wherein upon the occurrence of a Point of Non-Viability ("PONV") event as defined in the Guidelines, SBP may at its option, fully and permanently convert the TFCs into common shares of the Bank.
24	If convertible, fully or partially	Not applicable	Fully
25	If convertible, conversion rate	Not applicable	To be determined in case of trigger event(s)
26	If convertible, mandatory or optional conversion	Not applicable	Mandatory
27	If convertible, specify instrument type convertible into	Not applicable	Common Equity Tier 1
28	If convertible, specify issuer of instrument it converts into	Not applicable	MCB Bank Limited
	Write-down feature		
29	If write-down, write-down trigger(s)	Not applicable	The instrument will be subject to loss absorbency clause as stipulated in terms of the Basel III Guidelines wherein upon the occurrence of a Point of Non-Viability ("PONV") event as defined in the Guidelines, SBP may at its option, fully and permanently convert the TFCs into common shares of the Bank.
30	If write-down, full or partial	Not applicable	May be written down fully or partially
31	If write-down, permanent or temporary	Not applicable	Permanent
32	If temporary write-down, description of write-up mechanism	Not applicable	Not applicable
33	Position in subordination hierarchy in liquidation (specify instrument type immediately senior to instrument	Common equity ranks after all creditors and depositors	Subordinate to all other indebtedness to the Bank including deposits
34	Non-compliant transitioned features	No	None
35	If yes, specify non-compliant features	Not applicable	Not applicable

1.6 Risk Weighted Assets

The risk weighted assets to capital ratio, calculated in accordance with the State Bank of Pakistan's guidelines on capital adequacy was as

	Capital Requirements		Risk Weighted Assets	
	2018	**2017**	**2018**	**2017**
	-------------------------- Rupees in '000 -----------------------------			
Credit Risk				
Portfolios subject to standardized approach (simple or comprehensive)				
On-Balance Sheet				
Corporate portfolio	39,246,584	38,678,783	303,626,493	306,357,221

	21,186,884	21,459,246	163,909,788	169,969,022
Equity Exposure Risk in the Banking Book				
Listed	585,001	480,267	4,525,790	3,803,980
Unlisted	4,989,354	3,806,078	38,599,542	30,146,226
	5,574,355	4,286,345	43,125,332	33,950,206
Total Credit Risk	82,400,369	80,044,629	637,480,582	633,997,455
Market Risk				
Capital requirement for portfolios subject to standardized approach				
Interest rate risk	1,682,917	3,471,852	21,036,463	43,398,150
Equity position risk	2,662,498	3,125,557	33,281,223	39,069,463
Foreign exchange risk	39,743	4,985,510	496,787	62,318,875
Total Market Risk	4,385,158	11,582,919	54,814,473	144,786,487
Operational Risk				
Capital requirement for operational risks	9,030,596	9,330,463	112,882,444	116,630,794
Total	95,816,122	100,958,011	805,177,499	895,414,736

Capital Adequacy Ratios	2018		2017	
	Required	Actual	Required	Actual
	%	%	%	%
CET1 to total RWA	6.00%	16.02%	6.00%	14.42%
Tier-1 capital to total RWA	7.50%	16.02%	7.50%	14.42%
Total capital to total RWA	10.00%	18.13%	10.00%	16.44%
Total capital plus CCB to total RWA	11.900%	18.13%	11.275%	16.44%

* As SBP capital requirement plus CCB of 11.90% (11.275% in 2017) is calculated on overall basis therefore, capital charge for credit risk is calculated after excluding capital requirements against market and operational risk from the total capital required.

1.7 Credit Risk - General Disclosures

The Bank has adopted Standardized approach of Basel II for calculation of capital charge against credit risk in line with SBP's requirements.

Credit Risk: Disclosures for portfolio subject to the Standardized Approach

Under standardized approach, the capital requirement is based on the credit rating assigned to the counterparties by the External Credit Assessment Institutions (ECAIs) duly recognized by SBP for capital adequacy purposes. Bank utilizes, wherever available, the credit ratings assigned by the SBP recognized ECAIs, viz. PACRA (Pakistan Credit Rating Agency), JCR-VIS (Japan Credit Rating Company– Vital Information Systems), Fitch, Moody's and Standard & Poors . Credit rating data for advances is obtained from recognized External Credit Assessment Institutions and then mapped to State Bank of Pakistan's Rating Grades.

Type of Exposures for which the ratings from the External Credit Rating Agencies are used by the Bank.

Exposures	JCR-VIS	PACRA	Other (S&P / Moody's / Fitch)
Corporate	Yes	Yes	-
Banks	Yes	Yes	Yes
Sovereigns	-	-	Yes
SME's	Yes	Yes	-

The criteria for transfer public issue ratings onto comparable assets in the banking book and the alignment of the alphanumerical scale of each agency used with risk buckets is the same as specified by the SBP.

Long - Term Ratings Grades Mapping

SBP Rating Grade	PACRA	JCR-VIS	Fitch	Moody's	S&P	ECA Scores
1	AAA AA+ AA AA-	AAA AA+ AA AA-	AAA AA+ AA AA-	Aaa Aa1 Aa2 Aa3	AAA AA+ AA AA-	1

Credit Risk: Disclosures with respect to Credit Risk Mitigation for Standardized Approach

The Bank does not make use of on and off-balance sheet netting in capital charge calculations under Basel's Standardized Approach for Credit Risk.

Credit Risk: Disclosures for portfolio subject to the Standardized Approach

The Bank has strong policies and processes for collateral valuation and collateral management thus ensuring that collateral valuation happens at regular defined intervals. Collaterals are normally held for the life of exposure. Regular monitoring of coverage of exposure by the collateral and lien/ charge registered over the collaterals is carried out besides ensuring that collateral matches the purpose, nature and structure of the transaction and also reflect the form and capacity of the obligor, its operations, nature of business and economic environment. The Bank mitigates its risk by taking collaterals that may include assets acquired through the funding provided, as well as cash, government securities, marketable securities, current assets, fixed assets, and specific equipment, commercial and personal real estate.

The Standardized Approach of Basel-II guidelines allows the Bank to take benefit of credit risk mitigation of financial collaterals against total exposures in the related loan facilities. As a prudent and conservative measure while calculating capital charge for credit risk of on balance sheet activities, bank has taken only the benefit of Sovereign guarantees.

MCB manages limits and controls concentrations of credit risk as identified, in particular, to individual counterparties and groups, and also reviews exposure to industry sectors and geographical regions on a regular basis. Limits are applied in a variety of forms to portfolios or sectors where MCB considers it appropriate to restrict credit risk concentrations or areas of higher risk, or to control the rate of portfolio growth.

2. Leaverge Ratio

The leverage ratio is the ratio of Tier1 capital to total exposure, including off balance sheet exposures adjusted by regulatory credit conversion factors. The Bank's current leverage ratio of 7.09% (2017: 7.67%) is above the current minimum requirement of 3.00% set by the SBP.

	2018	2017
	---------Rupees in '000---------	
Eligible Tier-1 Capital	128,999,274	129,130,051
Total Exposures	1,820,404,530	1,683,406,323
Leverage Ratio	7.09%	7.67%

3. Basel III Liquidity Requirement

The Basel Committee for Banking Supervision (BCBS) has introduced Liquidity Coverage Ratio (LCR) and Net Stable Funding Ratio (NSFR) under its BASEL III reforms. As part of Basel III implementation in Pakistan, SBP issued guidelines on June 23, 2016 to implement Liquidity standards in line with BCBS timelines, keeping in view the conditions as applicable in Pakistan. The Bank is maintaining both the liquidity ratios, under Basel III, with a considerable cushion over and above the regulatory requirement to mitigate any liquidity risk.

Liquidity Coverage Ratio

Liquidity Coverage Ratio (LCR) aims to ensure that bank maintains an adequate level of unencumbered High Quality Liquid Assets (HQLA) which can easily be converted into cash at little or no loss of value in private markets, to withstand an acute liquidity stress scenario lasting for a period of 30 days horizon. LCR is defined as ratio of stock of HQLA to the total net Cash Outflows estimated for the next 30 calendar days.

All banks are required to maintain LCR at least on 100% on an ongoing basis. The Bank has been computing its LCR on monthly basis as per the instructions set out in SBP's guidelines issued on June 23, 2016. Average has been reported as simple averages of quarterly values of LCR of the financial year ended 2018. The quarterly values have been computed as simple averages of monthly observations of the previous quarter, as required by aforementioned SBP guidelines.

Governance of Liquidity risk management

Liquidity and related risks are managed through standardized processes established in the Bank. Board and senior management are appraised about liquidity profile of the Bank on periodic basis so as to ensure proactive liquidity management and to avoid abrupt shocks. The management of liquidity risk within the Bank is undertaken within limits and other policy parameters set by ALCO, which meets monthly and reviews compliance with policy parameters. Day to day monitoring is done by the treasury while overall compliance is monitored and coordinated by the ALCO and includes reviewing the actual and planned strategic growth of the business and its impact on the statements of financial position and monitoring the Bank's liquidity profile and associated activities. Bank's treasury function has the primary responsibility for assessing, monitoring and managing bank's liquidity and funding strategy. Market Risk Management Division being park of Risk management group is responsible for the independent identification, monitoring & analysis of risks inherent in treasury exposures. The Bank has in place duly approved Treasury policy along with risk tolerance/appetite levels. These are communicated at various levels so as to ensure effective liquidity management for the Bank.

Funding Strategy

Bank's prime source of liquidity is the customer's deposits base. Within deposits, Bank strives to maintain a healthy core deposit base in form of current and saving deposits and avoid concentration in particular products, tenors and dependence on large fund providers. Further, Bank relies on interbank borrowing for stop gap funding arrangements but, it is less preferred source of liquidity. Within borrowing, source of funding are also diversified to minimize concentration. Usually interbank borrowing is for short term. The Bank follows centralized funding strategy so as to ensure achievement of strategic and business objectives of the Bank.

Liquidity Risk Mitigation techniques

Various tools and techniques are used to measure and monitor the possible liquidity risk. These include monitoring of different liquidity ratios like cash to deposits, financing to deposit ratio, liquid assets to total deposits, interbank borrowing to total deposits and large deposits to total deposits which are monitored and communicated to senior management and to ALCO forum regularly. Further, the Bank also prepares the maturity profile of assets and liabilities to monitor the liquidity gaps over different time buckets. For maturity analysis, behavioral study techniques are also used to determine the behavior of non-contractual assets and liabilities based on historic data and statistical techniques. The Bank also ensures to maintain statutory cash and liquidity requirements all times.

Liquidity Stress Testing

As per SBP BSD Circular No. 1 of 2012, Liquidity stress testing is being conducted under various stress scenarios. Shocks include the withdrawals of deposits and increase in assets, withdrawals of wholesale/large deposits & interbank borrowing and utilization of undrawn credit lines etc. Results are escalated at the senior level to enable the senior management to take proactive actions to avoid any possible liquidity risk challenges for the Bank.

Contingency Funding Plan

Contingency Funding Plan (CFP) is a part of liquidity management framework of the Bank which identifies the triggers events that could cause a liquidity crises and describes the actions to be taken to manage the crises. At MCB, a comprehensive liquidity contingency funding plan is prepared which highlights liquidity management chain that needs to be followed. Responsibilities and crises management phases are also incorporated in order to tackle the liquidity crises. Moreover, CFP highlights possible funding sources, in case of a liquidity crises.

Main drivers of LCR Results

Main drivers of LCR Results are High Quality Liquid Assets and Net cash outflows. Net cash outflows are mainly expected deposit outflows net of cash inflows which consist of inflows from financing and fully performing exposure up to 1 month. The inputs for calculation of LCR are prescribed by the regulator.

Composition of High Quality Liquid Asset-HQLA

High Quality Liquid Assets composed of Level-1 Asset which can be included in the stock of liquid assets at 100% of their market value. The Bank maintained average HQLA of Rs. 609.586 billion (2017: Rs 608.140 billion) against the average liquidity requirement of Rs. 341.045 billion (2017: Rs. 313.260 billion) at prescribed minimum regulatory LCR requirement of 100% (2017: 90.0%). Bank's total HQLA constituted on Level 1 & Level 2B assets. Average level 1 assets of the Bank primarily include Cash & Treasury Balances (including balances held with SBP) and unencumbered investment in Government Securities. The Bank's average level 2b assets primarily include non-financial publically traded common equity shares of the Bank.

Concentration of Funding Sources

At December 31, 2018, top liability products/instruments and their percentage contribution to Total Liabilities of the Bank were Current & Saving Deposits 70.79%, Term Deposits 6.99%, and Rep borrowings 12.28%. As at December 31, 2018, Total Deposits and Borrowings mobilized from significant counterparties (i.e.; from whom funds borrowed were more than 1.00% of the Bank's Total Assets) constituted 11.09% & 1.93% of Total Assets of the Bank. Moreover, the Bank does not rely on top few depositors to meet its funding requirements. This clearly shows that funding sources for the Bank are well diversified.

Currency Mismatch in the LCR

The Bank predominately operates in the Pakistani Rupee. FCY exposures are maintained within pre-defined thresholds and liquidity for each foreign currency is managed by utilizing interbank market through currency swaps.

Intra-Period Changes (In LCR) as well as changes in Liquidity Risk over time

Bank's average LCR during the year 2018 remained 178.74%.

Centralization Of Liquidity Management & Interaction Between The Groups' Units

Overall responsibility for Liquidity risk management of the bank lies with the ALCO, which comprises representatives from all business groups and relevant support groups. The Bank maintains adequate liquidity at all times to meet all obligations as and when they become due. For overseas branches, decentralized approach is followed for day to day liquidity management by taking into consideration both respective host country's and SBP's regulations.

Other Inflows & Outflows

There are no other inflows & outflows in the calculations of LCR other than those that are already covered in the disclosure of LCR.

Derivative exposures and potential collateral calls

The Bank has no exposure to any counter party that could lead to a potential collateral call arising out of derivative transactions.

	2018		2017

4. Net Stable Funding Ratio (NSFR)

The objective of Net Stable Funding Ratio (NSFR) is to reduce funding risk over a longer time horizon by requiring banks to fund their activates with sufficiently stable sources of funding on ongoing basis. Banks are required to maintain NSFR requirement of at least 100% on an ongoing basis from December 31,2017.
